

METHODS AND SYSTEMS FOR PROVIDING CONSUMER SERVICES
INCLUDING COIN-COUNTING AND DIGITAL IMAGE PRINTING

ABSTRACT OF THE DISCLOSURE

Methods and systems are disclosed for providing consumer services such as coin-counting and digital image processing. In one embodiment, a kiosk can include a coin-counting apparatus and a digital image portion. The coin-counting apparatus can include a coin input region configured to receive a plurality of randomly oriented coins. The coin-counting apparatus can further include a coin counter to count the coins and arrive at a total of the coins. In one embodiment, a voucher can be dispensed that is redeemable for at least one of cash and merchandise. In another embodiment, the digital image portion of the kiosk can include a digital media input portion configured to receive digital media containing digital images, and a display screen for viewing at least one of the received digital images.
